The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a means of computing an estimated value of static friction of the steering system based on the steering force of a driver. The prior art discloses using an indication of steering force to generate a motor current that alleviates the effect of static friction on the steering system, but it is not disclosed that the current calculation means ever computes a numeric value for the estimated value of static friction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
